

Adopting Microsoft 365 for increased security

Microsoft 365 (M365) offers more options, the strongest security algorithms available, and continuous updates implemented by a team of experts dedicated to protecting your environment. M365 also eliminates the need to implement 3rd party security solutions – it's all included. How can you beat that?

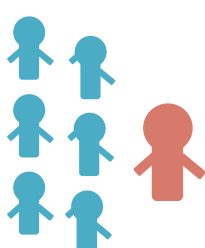

ALL ROADS LEAD TO AZURE

Integration and ease of use requires skill and knowledge

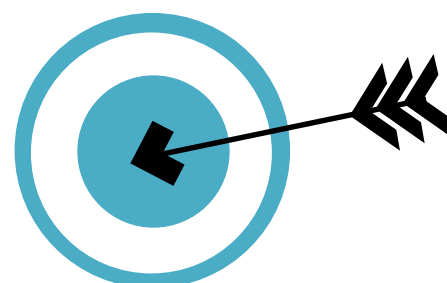

Continued product convergence is challenging to support without help

MAINTAINING SKILL LEVELS TO KEEP UP WITH ENHANCEMENTS IS COSTLY and DIFFICULT

Best Practices **ARE CRITICAL** IN IMPLEMENTING EFFECTIVE SOLUTIONS

SECURITY FEATURES INCLUDED IN M365

Office 365 Advanced Threat Protection (OATP)

OFFICE 365 Data Loss Prevention (DLP)

Azure Information Protection (AIP)

Monitor and ensure that links and attachments sent via email are safe

Protect certain kinds of information from being transmitted via email, and remain compliant with security policies, HIPAA, PCI, etc.

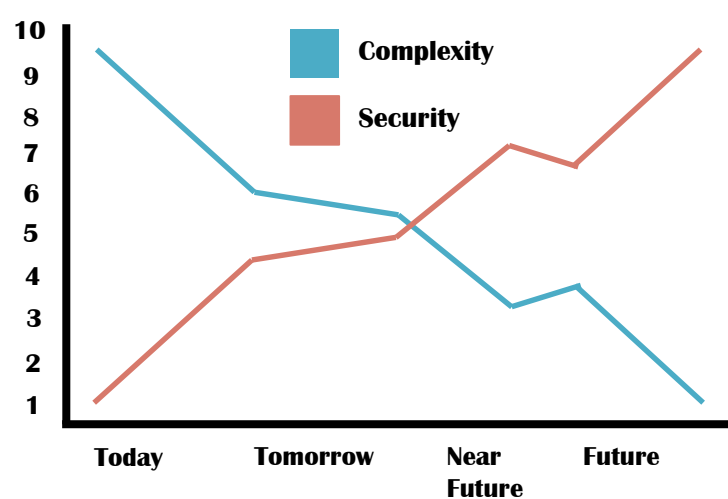

Protect sensitive data throughout lifecycle – both within files and during transmission

M365 delivers the modern, secure workspace and integrated cloud services that enable users to achieve more. It has been engineered to enable IT to deliver that rich and empowering work environment that is *Loved by User and Trusted by IT.*

Brad Anderson, Corporate VP, EM+S, Microsoft ConfigMgr@25, September 26, 2017

Partner with PlumChoice to increase security and reduce complexity for your M365 customers

Security permeates every aspect of the M365 environment

We use Microsoft 365 Enterprise to foster a modern and highly secure workspace for employees empowered by teamwork and collaboration – everything we need to succeed in a global, digital market.

Bobby Berry, Senior Vice President, Business Solutions, Fruit of the Loom

A complete, intelligent solution that empowers everyone to be creative and work together, securely.
